

Dx Geomagic® Design X™

The Ultimate
3D Scan-to-CAD Solution

Dx Geomagic® Design X™

Geomagic Design X, the industry's most comprehensive reverse engineering software, combines history-based CAD with 3D scan data processing so you can create feature-based, editable solid models compatible with your existing CAD software.

Broaden Your Design Capabilities

Instead of starting from a blank screen, start from data created by the real world. Geomagic Design X is the easiest way to create editable, feature-based CAD models from a 3D scanner and integrate them into your existing engineering design workflow.

Accelerate Time to Market

Shave days or weeks from product idea to finished design. Scan prototypes, existing parts, tooling or related objects, and create designs in a fraction of the time it would take to manually measure and create CAD models from scratch.

Enhance Your CAD Environment

Seamlessly add 3D scanning into your regular design process so you can do more and work faster. Geomagic Design X complements your entire design ecosystem, with native output to SolidWorks®, Siemens NX®, SolidEdge®, Autodesk Inventor®, PTC Creo® and Pro/ENGINEER®.

Leverage Existing Assets

Many designs are inspired by another. Easily scan into your CAD system. Learn from it. Reuse it. Improve on it. Easily rebuild your old parts into current CAD data, create drawings and production designs.

Do the Impossible

Create products that cannot be designed without reverse engineering, customized parts that require a perfect fit with the human body. Create components that integrate perfectly with existing products. Recreate complex geometry that cannot be measured any other way.

Reduce Costs

Save significant money and time when modeling as-built and as designed parts. Deform an existing CAD model to fit your 3d Scans. Reduce tool iteration costs by using actual part geometry to correct your CAD and elimination part springback problems. Reduce costly errors related to poor fit with other components.

A parametric solid models created in **Geomagic Design X**

Geomagic® Design X™ Features

- Direct 3D scanner control tools for the widest range of the most popular devices
- Full integration with Geomagic Capture Scanners
- Supports import of over 60 file formats including polygons, point clouds and CAD
- Expertly handles massive mesh and point cloud data alignment, processing and refining, mesh construction
- Easy-to-use mesh repair tools deliver rapid hole filling, smoothing, optimizing, re-wrapping and polishing tools such as Smart Brush
- Automatic, feature-based solid and surface extraction direct from 3D scans
- Rapidly creates solids or surfaces like you would in CAD
- Automated Accuracy Analyzer™ tools compare and validate surfaces, solids and sketches against original scan data
- Live Transfer™ supports the output of data to the industry's leading CAD systems
- Industry-leading "Exact" surface creation converts organic shapes to precise CAD models
- Supports comprehensive export of neutral CAD or polygon files
- Instantly create stunning renderings of your designs in Keyshot

Geomagic Capture® for Design X™

Powerful Scan-Based Design for the most demanding applications. Create CAD models in Design X and transfer them, with complete feature trees, to Siemens NX, PTC Creo, Pro/ENGINEER, Inventor and SOLIDWORKS.

Package includes:

Capture or Capture Mini scanner,
Geomagic Design X software

3D Systems provides comprehensive 3D products and services, including 3D printers, print materials, on-demand parts services and digital design tools. Its ecosystem supports advanced applications from the product design shop to the factory floor to the operating room. As the originator of 3D printing and a shaper of future 3D solutions, 3D Systems has spent its 30 year history enabling professionals and companies to optimize their designs, transform their workflows, bring innovative products to market and drive new business models. Specifications subject to change without notice. 3D Systems, Geomagic and the 3D Systems Logo are trademarks of 3D Systems, Inc. All other trademarks are the property of their respective owners.
